Cookie Policy

Effective 22 Nov 2026 Version 1.0 For everyone

The short version

- One cookie keeps you signed in; the app keeps your chats and files in your browser.
- Security cookies and device signals protect against bots and abuse.
- Our websites use analytics and ad cookies; you can block them in your browser or Google ad settings.

This summary helps you find your way. The full text below is what applies.

This policy explains the cookies and similar technologies (local storage, IndexedDB and device signals) used by electronhub.ai and its subdomains, including the app, docs, legal pages, community forum and status page. It supplements the Privacy Policy.

1. Strictly necessary

These make the Service work and cannot be switched off without breaking it.

Name or storage	Set by	What it does	How long
`refresh_token` cookie	Electron Hub (api.electronhub.ai)	Keeps you signed in; HTTP-only, not readable by scripts	About 7 days

Name or storage	Set by	What it does	How long
Local storage (`electron_hub.*`)	Electron Hub app	Your signed-in profile and API key, theme, preferences and drafts	Until you sign out or clear it
IndexedDB (`electron_hub_playground` , `electron_hub_ltm` , `electron_hub_vectors` , `eh_embed_cache` , `electron_hub_snapshots` , `electron_hub_forks` , `electron_hub_taskboard` and similar)	Electron Hub app	Your chats, workspace files, agent memory, search indexes, snapshots, task boards, skills and session tokens, stored on your device	Until you delete them or clear site data
Local and session storage (`eh.*` , `caprouter*` , `tweaks` , `deck-stage*`)	Electron Hub app	Checkout and billing progress, Rewards progress, Coding Plan state, translation cache, router and display preferences	Until you sign out or clear it; session storage until you close the tab

"Temporary chats" in the app stop new chats from being saved in your browser. They do not change what is sent to Model Providers.

2. Security and anti-abuse

Name or technology	Set by	What it does
Cloudflare cookies (`__cf_bm` , `cf_clearance`) and bot-detection script	Cloudflare	Tell people from bots and protect against attacks; runs on every page of our websites
Cloudflare Turnstile	Cloudflare	Bot check on some checkout and upgrade steps
Device fingerprint	Electron Hub	Computes a device identifier from browser and hardware characteristics when the app loads and when you claim Rewards, to prevent multiple-account and rewards abuse

3. Analytics and advertising

Name	Set by	What it does
Google Analytics (`_ga` , `_ga_*`)	Google	Measures visits and use of our websites
Google AdSense and Funding Choices	Google	Shows ads on some of our websites and asks for ad consent where required
Cloudflare Web Analytics	Cloudflare	Counts page views and load times without cookies
Forum and status page tools	Our forum and status page providers	Product analytics, support chat and advertising tags on those sites
Third-party ad and link pages	Ad and link-shortener networks	Pages you visit for Rewards set their own cookies

Google Analytics and AdSense load on our marketing website (electronhub.ai), not in the app; Cloudflare Web Analytics, which sets no cookies, runs on all our sites. Google may show its own consent message for ads in some regions. You can block them by blocking third-party cookies in your browser, installing Google's Analytics opt-out add-on, or turning off personalised ads in your Google ad settings.

4. Services your browser contacts

Some features load content from, or send data to, third parties directly from your browser:

- **Fonts and code libraries:** Google Fonts and public code CDNs (for example jsDelivr, unpkg and cdnjs) receive your IP address when pages load.
- **Translation:** if you choose a language other than English, interface text is sent to Google Translate.
- **Avatars:** your display name may be sent to an avatar service to draw a default avatar.
- **Maps:** map tiles come from OpenStreetMap.
- **Request-log locations:** when you open the Logs tab in the Console, the IP addresses in your request logs are sent to IP-lookup services to show their approximate location.

5. Other sites

Payment pages (Creem, lava.top, Ko-fi, NOWPayments), sign-in providers (Google, Discord), the community forum (ProductBridge) and other linked sites set their own cookies under their own policies.

6. Your choices

You can delete cookies and site data in your browser settings at any time. Clearing data for app.electronhub.ai signs you out and **permanently deletes the chats, files and memory stored in that browser** unless you exported them first (Settings → Data in the app).
