Copyright & DMCA Policy

Effective 22 Nov 2026 Version 1.0 For everyone

The short version

- Send infringement notices to support@electronhub.ai with the details listed below.
- If your content was removed by mistake, you can send a counter-notice.
- We close the accounts of repeat infringers.

This summary helps you find your way. The full text below is what applies.

We respect intellectual property rights and respond to notices of alleged copyright infringement under the US Digital Millennium Copyright Act (DMCA) and similar laws.

1. Sending a notice

Send notices to:

Email: support@electronhub.ai (subject "Copyright notice")

Your notice must include:

1. your name, address, telephone number and email address;
2. identification of the copyrighted work you say is infringed;
3. identification of the material you say is infringing, and enough information for us to find it (for example a URL);
4. a statement that you have a good-faith belief that the use is not authorised by the copyright owner, its agent or the law;
5. a statement, under penalty of perjury, that the information in the notice is accurate and that you are the owner, or authorised to act for the owner;
6. your physical or electronic signature.

2. Counter-notice

If material you posted was removed and you believe it was a mistake or misidentification, send us a counter-notice with your name, address, telephone number and email; identification of the material and where it appeared; a statement under penalty of perjury that you have a good-faith belief it was removed by mistake or misidentification; your consent to the jurisdiction of the federal court for your district (or, outside the United States, any judicial district where we may be found) and to accept service from the person who sent the notice; and your signature. We may restore the material after 10 business days unless the complainant tells us it has filed a court action.

3. Repeat infringers

We will suspend or close the accounts of users who are found to infringe repeatedly, in appropriate circumstances.

4. Model output

Model output is generated automatically and may resemble existing works. You are responsible for checking that your use of output does not infringe others' rights (see Terms Section 8.4).
