Model Provider Terms

Effective 22 Nov 2026 Version 1.0 For everyone

The short version

- Each model comes with its developer's usage policy or licence.
- You agree to follow them for the models you use.
- Where they are stricter than our terms, the stricter rule applies.

This summary helps you find your way. The full text below is what applies.

Every Model available through Electron Hub is subject to the usage policy or licence published by its developer. Under Terms Section 7, you agree to follow them for the Models you use, and where they are stricter than our Terms or Usage Policy, the stricter rule applies to that Model.

1. Main developer policies

Developer	Models include	Policy
OpenAI	GPT, o-series, gpt-image, Whisper, TTS	Usage policies
Anthropic	Claude	Usage policy
Google	Gemini, Imagen, Veo, Gemma	Generative AI prohibited use policy
xAI	Grok	Acceptable use policy
Meta	Llama	The Llama acceptable use policy published with each model version

Developer	Models include	Policy
Mistral AI	Mistral, Codestral, Devstral	Terms and usage policy at mistral.ai/terms
DeepSeek, Alibaba (Qwen), Moonshot AI (Kimi), Zhipu AI (GLM), MiniMax and other open-weight developers	Open-weight models	The licence and any use policy published with each model
Black Forest Labs, Stability AI and other image and audio developers	FLUX, Stable Diffusion and others	The licence and usage policy published by each developer

This table lists the main families. For any other Model, the developer's policy or licence published with that Model applies.

2. Open-weight licences

Some open-weight licences restrict commercial use, require attribution, limit use above a number of users, or forbid particular uses. Check the licence before you use a Model, or its output, commercially.

3. Changes

Developers change their policies from time to time, and the version in force when you send a request applies. A developer may also stop offering a Model through us; see Terms Section 3.3.
